PROFILE

Software Engineer specializing in the development of business applications, REST APIs, and full-stack web solutions. I work on the design, evolution, and modernization of business systems using technologies such as Laravel, Flask, React, Vue.js, MySQL, SQL Server, Docker, and Kubernetes. Curious, rigorous, and quality-oriented, I aim to contribute to high-value projects by combining technical reliability, maintainability, and continuous improvement.

PROFESSIONAL EXPERIENCE

La Voie Express Morocco | July 2025 - Present

Software Engineer - Full-stack Developer

- Contribution to the development and evolution of several business applications in logistics, transport, tracking, and billing.
- Design and improvement of backends, REST APIs, and business modules with Laravel / PHP and Flask / Python.
- Development of web interfaces and dashboards with React, Vue.js, Bootstrap, and Tailwind CSS.
- Management of internal tools such as VexToolbox and VexBalance (Docker, Nginx, Gunicorn).
- Securing applications and modernizing the technical ecosystem via JWT, OAuth / Sanctum, and Kubernetes.
- Continuous improvement of legacy and modern environments focusing on reliability and maintainability.

Royal Society for the Encouragement of the Horse (SOREC) Morocco | Feb 2024 - July 2024

Spring Boot Developer - Graduation Internship

- Development of a fleet management application using Java / Spring Boot.
- Design of secure REST APIs with JWT and data management via JPA.
- Contribution to frontend development with Angular and Thymeleaf.
- Participation in application deployment with Docker.

Provincial Hospital Center - Hassani Al Nador Morocco | June 2022 - Aug 2022

PHP/Symfony Developer - Internship

- Development of a patient record management application.
- Creation of backend modules with Symfony / MySQL.
- Development of web interfaces in HTML5 / Bootstrap.

EDUCATION

Private University of Fez (Universite Privee de Fes) Morocco

State Engineer in Computer Science

SKILLS

Skills: Backend development (Java, Spring Boot, PHP, Laravel, Symfony, Python, Flask) Frontend development (React, Vue.js, Angular, Bootstrap, Tailwind CSS, Thymeleaf) | REST APIs | Authentication and security (JWT, OAuth, Sanctum) Databases (MySQL, SQL Server) | Containerization and deployment (Docker, Docker Compose, Kubernetes, Nginx, Gunicorn) | Integration and evolution of legacy and modern systems | Tools (Git, Bash, Batch) | Working methods (Scrum, Kanban, Scrumban)
